

The ancient secrets to distinctions in exams

As the nerve-wracking dilemma of depression stacks up into a mountain of work and we approach into the season of exams, students tend to get agitated by the fact that they have to study each and every day, without taking a rest. Here are ancient secrets that have been discovered from the treasure of an island:

1. Always have a study buddy: The more study buddies you have, the more incorrect information you can give to them ,and a higher chance for you to get higher marks than them.
2. In a multiple choice question : you have a list of A,B,C or D to select, and when you cannot get the answer ,always choose A, because A stands for Answer.
3. When you get your exam paper, and you don't understand what is going on in the paper, you will stand up, stretch a bit, take a walk to the airport, pop in plane and never return!!!!

Hope you enjoyed the tips!☺
